Decot Hy-Wyd
SPORT GLASSES, INC.

AMERICA'S FINEST SPORT GLASSES

Since 1949 Decot Hy-Wyd Sport Glasses has been setting the standards for sports eyewear. Decot's unique frame is constructed of high quality spring metal and is set behind the interchangeable lenses eliminating smudging and fogging around the forehead and nasal area.

Decot glasses are made for all non-contact sports that require accurate sports vision, including Clays target shooting sports, rifle and pistol shooting, hunting, billiards, archery, fishing, golf, and are also great for everyday wear.

Sport glasses are all we do... and we do it for you! Give us a call at 1-800-528-1901 and speak with a live, professional, dedicated member of the Decot staff who will listen to your needs and assist you in making the best choice. The eyes of a champion depend on Decot! "Don't Settle for Less!"

Decot Hy-Wyd Sport Glasses, Inc., is committed to producing and guaranteeing the finest sport glasses under the sun.

Decot Styles:

Choose from four styles of custom-made glasses with over 40 shades of custom tinted lenses. Complete glasses come with frames, one set of lenses, carrying case and protective cloth. All Decot styles are designed with interchangeable lenses and include spring hinge temples, and all frames are covered by a LIFETIME warranty against manufacturer's defects.

Classic Hy-Wyds

Made in the USA, our unique frame featuring interchangeable lenses has never been duplicated in quality or service. The lenses set high and wide allowing a wide field of vision. The cable temples keep the glasses comfortably in place. The optional Hy-Lo bridge raises and lowers the frame to keep the optical center in the perfect place for any sporting activity. Choose between two designs: Classic Hy-Wyd or Classic Hy-Wyd with Hy-Lo Bridge. Available in 24K Gold electroplate or Black non-reflective finish, and in three sizes: 64 Jr./Ladies, 67 and 69-Extra Large. Available as a package.

Decot Revel

The Revel line of glasses is also made to the same high standards as its predecessors. The wrap design will still provide the high fit needed for shooting as well as provide a closer form fit to the face. The narrow lens design will still allow for proper ventilation and reduce fogging often associated with other wrap designs. As with the other Decot frame styles, the lenses are interchangeable, so the same varieties of proven lens colors are still available. This design is offered in two sizes: The Standard size is 64 and the Large size is 68. This style is available in Silver or the popular Black non reflective finish. (Limited Rx availability) Available as a package.

Decot Golf

Made with the same quality spring metal as the Classic Hy-Wyd frame, the Golf frame style has a wider nasal opening that allows the glasses to set lower on the face. This style is designed for everyday wear, and since the lenses are also interchangeable, they convert to sunglasses in an instant with optional lenses available. It comes in the 24K Gold electroplate or the Black non-reflective finish, and comes in two sizes: 61 Standard or 63 Large.

Classic Hy-Wyd

Hy-Wyd Hy-Lo

Decot Revel

Decot Revel Hunting Package

Decot Revel Action Shooting Sports Package

Decot Revel Clays Package

Decot Revel ColorMag Package

Decot Revel Ultimate Package

Package Deals:

Decot Hy-Wyd has assembled a series of eyewear packages offering you a collection of lens tints specifically tailored to your shooting needs. Best of all, these packages come standard with shatterproof Polycarbonate lenses and are available in both versions of the Classic Hy-Wyd or the Decot Revel style. All packages are now available in plano non-prescription, single vision, and bifocal.

Hunting Package

The Hunting Package includes a set of Gold Light Medium 15 lenses for first light or hunts close to sunset. A pair of V-Lite Rose Lite Medium 1 lenses for daytime Pheasant, Quail or any upland game hunting. And finally a Bronze Medium 2 designed to increase contrast of prey against outdoor background colors.

Action Shooting Sports Package

The Action Shooting Sports Package was designed for shooting IPDA, USPSA, 3-Gun, and IPSC. This package includes a set of Gold Lite Medium 15 for indoor ranges, extreme low light, or even shoot houses. Additionally, a pair of Target Orange Lite Medium for increased target contrast on cloudy days. Finally, our Bronze Medium 2 which is designed to increase target contrast while shading the eyes on bright sunny days.

Clays Package

The Clays Package includes the Target Orange Lite Medium for low light, V-Lite Rose Light Medium 1 for average light, and ColorMag lenses for ultimate contrast on bright sunny days.

ColorMag Package

The ColorMag Package includes all three shades of the popular ColorMag line. ColorMag lenses utilize a spectral isolation filter in order to provide ultimate contrast.

Ultimate Package

And for the shooting enthusiast that does a bit of everything, the Ultimate Package contains all of the lenses from both the Clays and Hunting Packages.

Lens Materials, Coatings, Colors and Shades:

All Decot non-Rx lenses come standard in our shatter proof Polycarbonate lens material. Due to the fact that Decot Hy-Wyd provides eyewear for various non-impact sports, other outdoor activities and shooting sports, all Rx lenses come standard with CR-39 impact resistant lenses*. Hi-Index lenses are available for certain stronger prescriptions. If your sport requires a shatter proof lens we offer Polycarbonate and Trivex materials.

Most Popular Colors: Color is representational and may not look exactly like the actual product. See complete list below.

***NOTE: The purchase of CR-39 or Hi-Index lenses automatically implies acknowledgement and the understanding that these lens materials meet all impact resistant standards in FDA 21 CFR 801.410. (d)(2). This does not mean that these lenses are shatterproof.**

Lenses and Color Recommendations...

For average daytime light conditions:

Light to medium shades of...

V-Lite Rose: Fantastic when shooting orange, orange with black edge and black targets. This lens darkens the sky and fades out the green background. Also, excellent for hunting.

Target Sun (Purple): Good for all colored targets. Also fades out green background which enhances the target. For sun sensitive eyes the target sun is a little cooler than the more intense V-lites.

Bronze: A good all purpose lens for skeet, trap and sporting clays on bright days and general hunting conditions.

Vermillion (Red): Most of the lenses described above have a percentage of Vermillion chemicals in the coating to enhance the target colors. People who have a red/green color deficiency find this tint best for general conditions.

Orange Ice, Pink Blaze, Rose Blaze: These tints are enjoyed by many who like the brightness of target color and sharp contrast to the background.

Blue Ice: Custom developed for lime green targets.

For low light conditions:

Target Orange: Good all around shade for orange targets especially on overcast days or average sunlight.

Gold, Clear, Fawn, Yellow: These colors give you a high amount of light transmission and better definition of your target.

Anti-Reflective Coating: Eliminates all reflection off the surface of a lens giving you a maximum light transmission for sharper focus. Special lens handling is necessary.

For intense sunlight or glare:

Darker shades of V-Lites, Target Sun, Bronze and Grey are available. Also available are Polarized lens shades good for medium to intense sunlight causing glare. Good for fishing, hunting, target shooting and driving.

We recommend you stay with the lightest lens shade that is comfortable for you. This will allow the pupil to constrict, providing better depth of field.

Color List	Shades			
Clear	Clear	Fleshstone	Fawn	
Gold	Lite 10	L.M. 15		
Yellow

Non-Prescription and Prescription Lenses:

Decot makes non-prescription and prescription lenses for Decot Sport Glasses as well as Post 4, Ranger, Browning, Serengeti, B&L Shooters, and Zeiss Shooting Glasses. Plano (non-prescription), single vision prescription, and bifocal lenses are available. Bifocals are usually done in a small "round 24" for shotgun sports and in flat top 28 or 35 for everyday and fishing use. For pistol shooting, you may choose to have your bifocal inverted, or you may want to have your "aiming eye" lens in an intermediate power.
